CURRICULUM VITAE

GALVÁN RIAL, Dante Sebastián

PhD Candidate in Neuroscience

CONICET PhD Fellow | Supervisor Pablo Barttfeld

Instituto de Investigaciones Psicológicas (IIPsi), CONICET–UNC, Argentina

Phone: +54 2954 15 271169

Email: sebas.galvan@mi.unc.edu.ar

Brief Vitae

He is currently a PhD candidate in Neuroscience and a CONICET doctoral fellow at the Instituto de Investigaciones Psicológicas (IIPsi), Universidad Nacional de Córdoba, Argentina. His research centers on the characterization of brain states through resting-state fMRI, combining network-based analyses, dynamic functional connectivity, and complexity measures such as entropy to study alterations across clinical, pharmacological, and behavioral conditions. His work involves the development and application of full neuroimaging pipelines, multimodal integration, and time-resolved analyses, with attention to their conceptual and epistemological implications for the study of consciousness. Galván has experience working in collaborative, multi-site research environments and in the processing and analysis of large-scale neuroimaging datasets using computational and statistical tools. He is particularly interested in interdisciplinary frameworks that integrate quantitative neuroscience with phenomenological and philosophical perspectives. He considers himself intellectually curious, methodologically rigorous, and strongly committed to the development of coherent and reproducible research in neuroscience.

Research Experience

Neuroimaging Team Member – ReDLat (Latin American Network for Dementia Research)

March 2024 – Present

Development of full MRI and resting-state fMRI pipelines using Python and MATLAB | BIDS conversion, data standardization, and quality control (MRIQC) | Preprocessing using fMRIPrep, FSL, and SPM | Multi-site harmonization of neuroimaging data | Dynamic functional connectivity analyses, including sliding-window approaches, high-order connectivity matrices, and sample entropy–based metrics

---

Education

PhD Candidate in Neuroscience (CONICET PhD Fellow)

Laboratory of Cognitive Sciences (https://cognitivesciences.github.io/) Instituto de Investigaciones Psicológicas, Faculty of Psychology National University of Córdoba (UNC), Argentina

Supervisor: Dr. Pablo Barttfeld

BSc in Psychology. Faculty of Psychology, National University of Córdoba (UNC), Argentina

---

Fellowships and Grants

PhD Research Fellow – CONICET

Project: "Multimodal Variational Autoencoders for Alzheimer's Disease and Related Dementias. Integration of neuroimaging and vulnerability factors."

Research Fellow – CIN (National Interuniversity Council, Argentina)

Project: "Diagnosis and prognosis of patients with disorders of consciousness through EEG-derived brain states" (2024)

Supervisor: Dr. Pablo Barttfeld

Co-supervisor: Dr. Juan Carlos Godoy

Publications and Scientific Output

Peer-reviewed Articles

- Hazelton J, Migeot J, Gonzalez-Gomez R, Altschule F, Duran-Aniotz C, Wen O, Galván Rial DS, Barttfeld P, Ibanez A. *Cardiovascular risk factors and the allostatic interoceptive network in dementia*. Cardiovascular Research, 2025. https://doi.org/10.1093/cvr/cvaf185
- Della Bella G, Velez Picatto A, Galván Rial DS, et al. *The Neurophenomenology of a Self-Induced Transcendental Visionary State: A Case Study*. NeuroImage, 2025. https://doi.org/10.1016/j.neuroimage.2026.121784

Book Chapter

- Galván Rial DS. *From ritual to protocol: the conflict around psychedelics*. In: Paz García AP (Ed.), *Drugs and the public good: contributions from behavioral sciences*. IIPsi–CONICET–UNC, 2025.

Conference Posters (selected)

- Entropy and small-world metrics in Alzheimer's disease, frontotemporal dementia, and schizophrenia. Argentine Congress of Neuropsychology (SONEPSA), 2025.
- Scalar gradients across levels of consciousness: dynamic brain networks in anesthesia and psychedelics. Latin American Congress of Cognitive Neuroscience, 2025.
- Brain entropy as a biomarker of altered states under LSD using fMRI. Annual Meeting of the Argentine Neuroscience Society (SAN), 2024.

Additional Research Experience

Research Project (2023)

Hybrid educational practices at the National University of Córdoba

Funded by SAE-UNC and SeCyT.

Research Assistant (2022)

Longitudinal studies on substance use, affective symptoms, mindfulness, impulsivity, and emerging adulthood.

Córdoba, Argentina.

Additional Training

- Neuromatch Academy – Computational Neuroscience, Online (2024, 128 hours).
- Graduate Course: Computational Neuroscience, Universidad Nacional de San Martín.
- Graduate Course: Neural Networks, FAMAF–UNC (2024).
- FSL Course, Centre for Integrative Neuroscience, University of Oxford (2023, 50 hours).
- International Brainhack School, AI for Neurotechnology (2023).

Teaching Experience

- Tutor, Brainhack School, Instituto Humai, Argentina (2024).
- Tutor, Diploma in Cognitive Neuroscience, Neurotransmitiendo.
- Undergraduate Teaching Assistant, Neurophysiology and Psychophysiology, UNC (2023).
